

Planters with Purpose

Physical infrastructure that enhances safety for bicyclists can also contribute to community greening and beautification.

Strong, Durable, Portable

Our 4'-long [STEELGREEN® Planters](#) are multi-purpose structures designed for bike lane buffer zones: protective, green and movable. Made of 100% steel and galvanized for rust resistance, their heavy-duty basin is also available in your choice of color, and their forklift-ready base can be anchored to a concrete or asphalt surface for added stability.

Semi-Customizable

Sleek side panels invite customization to promote community identity. Add city logos/imagery, wayfinding graphics, or even a sponsor's branding/messaging using adhesive-back decals.

Additional options include a self-watering system for maintenance reduction, and an optional [PEDI STILL® Hand+Foot Rest](#) for Planters located at intersections.

STEELGREEN Planters can be combined with [BIKERAIL®](#), [CURBRAIL®](#) and [RAILRIBBON™](#) to create protective, appealing corridors and corners, and are also appropriate for placement in transit corridors, streetscapes, pedestrian malls, urban plazas, and corporate and academic campuses.

STEELGREEN® Planters at a Glance

- All steel construction
- Strong, durable, protective
- 48"L x 24"W x 25"H
- 202 lbs empty; ~502 lbs full soil load
- Forklift-ready
- Anchor-ready
- Weep holes for drainage
- Semi-customizable
 - Optional self-watering system
 - Optional [PEDI STILL® Hand+Foot Rest](#)
- Galvanized or powder coat color finish

Self-Watering

Improve plant health and reduce water waste and maintenance costs with optional self-watering systems. Place reservoir in the Planter. Attach tube, and fill with water. Plants' root systems absorb moisture as needed. Excess water drains through holes in all four corners of the Planter's basin.

Add a PEDI STILL® Hand+Foot Rest

The galvanized steel PEDI STILL accessory turns STEELGREEN Planters into convenient red-light rest stops when located in bike lane buffer zones at signalized intersections. Bicyclists grab, hold, and stay on their bikes while awaiting the green light. Choose the hand rail, the foot rest (with non-skid surface), or both.

Elegant Combinations

For a unique and complete solution, combine STEELGREEN Planters with BIKERAIL®, CURBRAIL® and RAILRIBBON™ to create protective, highly visible and aesthetically pleasing corridors and pedestrian spaces.

Finish Options

STEELGREEN Planter basins are available in a galvanized finish, or in your choice of durable powder coat colors (over galvanized). Popular colors are shown in chart.
